REVISIONS & CONSULTATION FEE

While we endeavour to correct the colour and tone as close to your artworks as possible, sometimes an artist may want an extra high level of care applied to their reproductions. As such we have introduced a revisions fee, meaning you can control how much extra time we spend on your files.

First 15 minutes of revisions are free, and then it's \$30 for every 15 minutes after that. For any extreme corrections we will craft a custom quote for you.

We find that the most efficient way to make revisions is by booking an appointment to come into the studio so you can view your files on our calibrated monitors and compare to your artworks under our daylight balanced display lights. This way we can work side by side to make your artworks shine to their full potential.

Prices listed are for reproduction of the artwork only. Prices do not include prints.

A1	59.4 x 84cm	400MB	\$50	\$80

FILM SCANNING - FLEXTIGHT X5 HIRE

1 Hour	Half Day (4 hours)	Full Day (8 hours)
\$80 inc GST	\$300 inc GST	\$500 inc GST

How many scans can I do in an hour?

This quite a subjective question, as the answer lies in how much scanning experience you have, the condition of your film and the film types. For example, black and white scanning is much faster than colour.

As a guide, we typically spend about 10-15 minutes setting up the first scan, and then if the rest of the film is of a similar nature, it takes about 3-4 minutes to load and scan each frame.

If you are focused on speed, we would recommend scanning with the 3F function, which allows you to make corrections at home at your own convenience. This allows for a much higher volume of scans than scanning straight TIFF.

Minimum turnaround time for a raw drum-scan is two weeks from the date we receive your film. This is subject to change and larger batches of film will require significant additional time.
Contact us for our current turnaround time in order to ensure we can meet your deadline.

Minimum order for a drum-scan is \$100. Drum-scanning is a material and labour intensive process and this amount ensures we cover our service costs.

Film strips. Please cut out your individual frames from a film strip. If you prefer to keep your strip as a whole, an additional 25% fee will be added to your order.

Film rebates. Please specify if you would like rebates included. Drum scans will be provided without a rebate by default.

Nominal print size is the equivalent of a full-res scan at 300dpi, without interpolation. These dimensions should serve as a guide only. Drum-scans offer incredible detail and are often enlarged beyond their nominal print size with excellent results.

PRICES INCLUDE GST.
